

Connect to the Lapeer Internet Server

- Double-click on the LapeerNet icon on the screen.

The screenshot shows a Windows-style dialog box titled "Connect To" with a "LapeerNet" icon. The dialog contains the following fields and controls:

- User name:** A text box containing "USERNAME@lcl.lib.mi.us".
- Password:** An empty text box.
- Save password:** An unchecked checkbox.
- Phone number:** A text box containing "667-7248".
- Dialing from:** A dropdown menu showing "Default Location" and a "Dial Properties..." button.
- Buttons:** "Connect" and "Cancel" buttons at the bottom.

- A window will appear asking for your login information.
- The login box will have the login id of the last person to access this connection.
- You will need to change the login to your login id, if it is not already. (make sure to use the complete id, e.g. *yourloginname@lcl.lib.mi.us*, where *yourloginname* is the login id supplied to you)
- Next, enter your password. (it will be hidden so others cannot see it)
- Press enter or click on the *Connect* button.
- The modem will dial the phone number and complete the connection.
- Once connected you will see a connection icon in the lower right corner of the screen. (if using Windows NT: this is where you will go to disconnect later when you are through)
