

Using the Hotmail Dictionary and Thesaurus

- If you are unsure if all the words you used in your email message are spelled correctly then it may be a good idea to use Hotmail's dictionary.
- Notice the *Check Spelling*, *Dictionary*, and *Thesaurus* buttons on the screen as you are creating your email message.
- By clicking on the *Dictionary* or the *Thesaurus* button you can enter a single word to find its dictionary definition or to find synonyms, antonyms and related words.
- If you click on the *Check Spelling* button Hotmail will scan your message and make suggestions from its dictionary for words it does not recognize.

- Select the word from the *Suggestions* list and click *Change*.
